Professional Summary

First-year Computer Science undergraduate with hands-on experience in Java, React.js, JavaScript, HTML, CSS, and n8n workflow automation. Actively practising Data Structures and Algorithms with consistent problem-solving on LeetCode and CodeChef, with a strong focus on clean implementation, logical thinking, and scalable web development.

Experience

Elixios <i>Web Development Intern // Front-End Developer</i>	Bhubaneswar, India Apr 2026 - Present
• Currently designing and building SEO & AEO optimized websites for various clients.	

Education

Siksha 'O' Anusandhan University <i>Bachelor of Technology in Computer Science & Engineering</i> Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems	Bhubaneswar, India Aug 2025 - Sep 2029
St. Xavier's High School, Kedargouri <i>Class XII, Science Stream</i>	Apr 2023 - Apr 2025

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3, Python, SQL, Java
Frameworks & Libraries: React.js, Tailwind CSS
Tools & Platforms: Git, GitHub, VS Code, Figma, Linux, REST APIs
Databases: MySQL, Firebase
AI & GenAI: Prompt Engineering, Agentic AI, LLM Integration, RAG

Projects

CosmicWatch <i>Django, NASA NeoWs API, Docker, SQLite, Railway</i> 🐙 GitHub	Feb 2026
• Designed and deployed a role-based asteroid-tracking platform integrating the NASA NeoWs API, serving live near-Earth object feeds with automated risk categorization (high/medium/low) across two user tiers — general users and admin researchers.	
• Built RESTful JSON API endpoints (<code>/api/comments/</code> and <code>/api/notes/</code>) with session-aware role-based authorization; persisted all user data server-side via Django ORM across a normalized schema with 6+ relational tables.	
• Containerized the full stack with Docker; shipped to a Railway cloud environment via a collect static CI pipeline, achieving a stable, production-grade deployment supporting 10 concurrent user sessions.	
Sentinel-X <i>n8n, HTML, CSS, Node.js, Grog, SerpAPI, JavaScript</i> 🐙 GitHub	
• Built a multi-agent autonomous ecosystem for detecting and responding to illegal deforestation, orchestrating two specialized AI agents — a Field Researcher and a Policy Director — using n8n's visual agentic workflow to produce structured, SDG-aligned governance responses.	
• Integrated SerpAPI, Wikipedia, and HTTP tools into the Field Researcher Agent for real-time evidence gathering and anomaly detection; the Policy Director Agent synthesized findings into a strict JSON policy output covering threat level, risk assessment, and immediate action.	
• Developed a cyber-operations-style browser dashboard with a scenario injection panel, terminal-style orchestration log, and policy output renderer; bridged browser-to-n8n communication via a lightweight Node.js CORS proxy.	

Certifications & Training

Infosys Frontend Web Developer Certification — Comprehensive program covering modern HTML, CSS, JavaScript, and React development.

Achievements & Activities

- Secured 2nd Prize at the Ananta Chakra Agentic AI Council Hackathon, demonstrating strong applied AI problem-solving and innovation under competitive conditions.
- Served as Anchor at the Annual Techno-Cultural Fest, showcasing polished communication, stage presence, and effective event hosting before a large audience.
